

Features of AM-9

- 1) 1x4 One-Channel LED Flasher, 10-400mA LED Drive,
- 2) 255+1 customizable flash codes with one UNLIMITED user-programmable code,
- 3) 15+1-step current control with one user-programmable level,
- 4) User-programmable Photocell thresholds,
- 5) 5.2V-9V DC input, Very-Low-Loss reverse polarity protection,
- 6) TracSwitcher Technology with 83%-89% overall efficiency,
- 7) 2mA quiescent input current,
- 8) Maximum LED current error +/- 3mA,
- 9) Built-in user-programmable battery charger controller (selected models),
- 10) Built-in LED short/open detection and protection,
- 11) RS485 Port, remote control ready,
- 12) GPS Uniflash-III ready,
- 13) Real-time clock with programmable season control (selected models only, coming soon),
- 14) Free APICalibartor-II software

Features of ALP-3:

- 1) 5-30V operating voltage,
- 2) 8-channel Solar Panel connections with built-in blocking diodes, max 1A/channel, 5A-total,
- 3) 3-channel battery connections with built-in 3A fuses on every channel,
- 4) On/Off control terminal rated for 0-30V input. Pull this terminal to low (ground) to shutdown the charging circuit.
