

PHALCONET RADAR TARGET ENHANCER

This RTE has been designed for marine use, to enhance the radar return of what is otherwise a poor radar target. In adverse weather a target may disappear into the sea clutter. When fitted with the RTE the enhanced return dramatically increases the likelihood of detection.

The low power consumption makes this ideal for use on floating marks, remote sites, yachts and cruisers, especially where power is at a premium.

FEATURES

- Easy installation.
- Maintenance free.
- Lightweight (1Kg).
- Low power consumption (12v battery).
- Active radar reflector.
- Safety at sea.
- Reduces risks of collision and pollution.
- Saves lives.
- “See in the dark”.
- Available from stock.

Pharos Marine Phalconet

APPLICATIONS

- Cruisers.
- Yachts.
- Fishing vessels.
- Seismic vessels.
- Buoys.
- Piers/jetties.
- Offshore structures.
- Emergency marking.
