

NS-35 AC BRIDGE LANTERN QUICK START GUIDE

NS-35 LED High Intensity marine lantern combines a light source, it has an internal AC/DC convertor and is ready to have 120/240 VAC applied. Once power is applied 2 small green LED's will be lite on top of the control board indicating that power is applied properly, the NS-35 will now be ready for final installation.

NS-35 bridge lanterns are pre-programmed for STEADY ON and will operate 24/7.
