

PMB600RM

0.6m Zone Marking Buoy

OVERVIEW

PMB600RM is an outstanding small-range buoy suitable for in shore/estuary locations. Consisting of 1 piece virgin MDPE, UV stable float sections filled with closed cell, water resistant polyurethane foam and built around an integral steel core incorporating one lifting and mooring eyes for optimum strength and reliability. Manufactured from virgin, UV stabilized MDPE offering strength and lightweight characteristics. The flexible design is adaptable to a wide range of Self-Contained Navigation Lights, internal Radar Reflector, and extra handles.

The buoys are built to last in extreme conditions. Even if the skin is punctured, the close cell foam filled polyethylene hull sections negate water absorption and keep it fully operational.

The range has been designed for ease of installation and transportation. They can be shipped and deployed or maintained quickly on-site.

The design of our Rotationally Moulded Polyethylene Buoys is meant to give customers the best of both worlds. They are lighter than steel, provide excellent performance, longevity and cost less. Maintenance is easy and a lower overall cost and a wide range of competitively priced accessories are available.
