

White Paper / Press Release:

Upsurge in Aids to Navigation (AtoN) Decommissioning Expertise from Pharos Marine Automatic Power

September, 2015 - A direct effect of the current Oil & Gas price change on owners and operators has been the necessary review of existing platforms, and to assess the short and long-term viability of each individual production facility.

The significant growth in decommissioning and hibernation of assets directly demonstrates the economic decisions being made as owners and operators plan within our ever changing environment; it has been Pharos Marine's lead in providing innovative decommissioning solutions to the market that has contributed to the business experiencing an increase in year-on-year sales of 80%.

To ensure the most effective Aids to Navigation (AtoN) marking solutions, Pharos Marine Automatic Power (PMAPI)'s leading engineers and R&D team have reviewed the navigational, operational and economic decision drivers, and created a highly innovative solution to support the requirement for temporary navigational aid systems.

The core AtoN decommissioning system brings together PMAPI's AtoN products, and tailors the system, installation, commissioning and service to include:

- Self-contained solar power
- Use of a Wind Turbine
- PMAPI Navigational Aids, Control Panels, Ex Enclosures & Instrumentation
- Helicopter drop skid installation and commissioning capability
- IALA compliant
- PAMPI In-House OEM Servicing & Maintenance
- Multi-lingual Customer Service support

To learn more about PMAPI's decommissioning Aids to Navigation systems and solutions, you can:
